SAURABH SINGH

Senior Software Engineer · Full-Stack & Distributed Systems · Payments Infrastructure

hello@iamsaurabh.in | +91 85768 58692 | Bengaluru, India | iamsaurabh.in | saurabhsinghrbz | SaurabhSinghRbz

SUMMARY

Senior Software Engineer with 5+ years building payments and distributed-systems infrastructure at Pine Labs (Qwikcilver · Woohoo). Own the Go service running the gift-card lifecycle behind HDFC, Axis and Woohoo storefronts, built and ran a 500+ TPS message-queue platform solo for 18 months, and shipped a multi-tenant UAE payments platform end to end.

PROFESSIONAL EXPERIENCE

Pine Labs (Qwikcilver · Woohoo) Senior Software Engineer — Apr 2024 – Present · Bengaluru

Go (chi, GORM) · MySQL read/write split · MongoDB · Redis · Message Queues · OpenTelemetry · AWS ECS

- Own the gift-card order lifecycle in a Go service — activation, shipping, wallet credit, PIN reset, cancel and reissue.
- Architected an async monitor-queue pipeline with row-level idempotency — 100,000+ card bulk orders, no duplicates.
- Kept irreversible card operations safe using explicit state machines, pre-commit audit records and reconciliation jobs.
- Split hot balance and status reads onto MySQL replicas; traced with OpenTelemetry and shipped blue/green to AWS ECS.

Pine Labs (Qwikcilver · Woohoo) Software Engineer — Nov 2022 – Mar 2024 · Bengaluru

Node.js · Express · MongoDB · Redis · ActiveMQ (STOMP) · PostgreSQL · Hasura GraphQL · Vue.js · Docker

- Built and ran a multi-tenant B2B message-queue platform solo for 18 months — 500+ TPS, millions of messages daily.
- Guaranteed exactly-once activation on at-least-once delivery via idempotency, dedupe keys, backoff retries and DLQs.
- Migrated the broker from per-call Iron.io to self-managed ActiveMQ behind a pluggable layer, turning linear spend into flat cost.
- Shipped a Vue operations console with RBAC, bulk uploads and per-message tracing and replay, making support self-serve.
- Extended the notification service behind every email, SMS, WhatsApp and OTP — templates, failover, PII encryption.

Masai School Full-Stack Development Trainee — Sep 2021 – Nov 2022 · Bengaluru

2,200+ hours of full-time MERN training (1,200 building, 1,000 DSA) · 7 applications shipped · Comeback Kid & Rising Star awards

SELECTED PROJECTS

Woohoo Gift-Card Commerce Platform, Pine Labs — woohoo.in · Live

Go · Node.js · MySQL · MongoDB · PostgreSQL · Redis · ActiveMQ · AWS ECS

- Three services I own form one order path — the Go core queues work, the platform returns idempotent stages, delivery notifies.
- Powers issuance and activation for a 300+ brand catalog across woohoo.in and the HDFC, Axis and FairPrice storefronts.

Smooth Payments, POS & Loyalty Platform, UAE — smoothpay.ai · Live

NestJS · Prisma · PostgreSQL · Redis · Socket.IO · Stripe · React + Vite

- Owned a multi-tenant QR-ordering and payments platform end to end — data model, API, dashboards, customer app, deploy.
- Integrated Stripe, Telr and AFS with Apple Pay/Google Pay, multicurrency links, and idempotent row-locked settlement.
- Live order state over Socket.IO, JWT/OAuth tenant isolation, and a rewards and loyalty ledger with guest-claim tokens.

TECHNICAL SKILLS

Languages Go, TypeScript, JavaScript, SQL

Backend Node.js, Express, NestJS, chi, GORM, Prisma, Hasura GraphQL, REST APIs, Microservices

Data PostgreSQL, MySQL, MongoDB, Redis, ActiveMQ, Query Optimization

Frontend React, Next.js, Vue.js, Zustand, Tailwind CSS

Cloud AWS (ECS, S3, ECR, KMS), GCP, Docker, nginx, CI/CD, OpenTelemetry, New Relic

Architecture Distributed Systems, Event-Driven Architecture, System Design, Idempotency, Multi-Tenancy, JWT/OAuth, RBAC

EDUCATION & CERTIFICATIONS

B.C.A., Information Technology — Amrita Vishwa Vidyapeetham — 2024 – 2026

Diploma, Mechanical Engineering — Government Polytechnic, Lucknow — 2019 – 2022

Certifications Google Cloud Computing Foundations (2026) · Docker & Kubernetes (2024) · HackerRank JavaScript & REST API
